Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/26/04 has been entered.

Election/Restrictions

2. Applicant's election with traverse of the invention of Group I, Claims 29, 30, 41 and 42, in the reply filed on 4/26/04 is acknowledged. The traversal is on the ground(s) that the inventions are not distinct because Groups I and II are not species and are directed to products of inventions. This is not found persuasive because while the scope of both groups of inventions are directed to a process of making, the body of each group does require specific products as each product can be defined as a materially different species, one as a single electron-emitting device, and one with a plurality of electron emitting devices. In the instant case, Group I does not require any plurality of electron-emitting devices or any light-emitting member, as required by Group II. Applicants have diverged from the original claimed invention by with the limitations added to Claim 49, i.e. Group II, in the amendment filed 11/17/03. The restriction requirement was based upon this divergence and the requirement is still deemed proper and is therefore made FINAL.

Art Unit: 3729

3. Claims 49 and 50 have withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/26/04.

Claim Objections

4. Claim 29 is objected to because of the following informalities: the phrase of “a energization” (1st occurrence on line 16) should be replaced with the phrase of --an activation--, as this would more appropriately agree with the terminology used in the specification (page 20, lines 14-15). Appropriate correction is required.

Allowable Subject Matter

5. Claims 29, 30, 41 and 42 are allowed.

Conclusion

6. This application is in condition for allowance except for the following formal matters. Cancellation of Claims 49 and 50 drawn to an invention nonelected with traverse in the reply filed on 4/26/04, (37 CFR 1.144) See MPEP § 821.01.

The suggested change to Claim 29 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte* Quayle, 1935 C.D. 11, 453 O.G. 213.
